

New sealant and wheel conditioner solutions

Pathway Polymers is offering several new products to the tyre market. These products include a new high-speed sealant and several types of wheel conditioners that are available exclusively through the company.

TyrFil High-Speed Sealant is specially designed for commercial trucks travelling at highway speeds. According to Pathway Polymers, the new product offers a variety of benefits including:

- Seals punctures up to ¼" in tread area
- Augments balance and prevents imbalance
- Prevents and eliminates rim rust and corrosion in steel and aluminium wheels
- Keeps tyres running cooler
- Works in temperatures to negative 25 °F

TyrFil Wheel Conditioners are available in a few varieties. The wheel conditioner offers the following benefits:

- Cools tyres by 10 – 20 °F to extend tyre life
- Prevents and eliminates rust and corrosion
- Increases tread and tyre life
- Lubricates rims for easier dismounting
- Environmentally friendly

According to the company, this wheel conditioner is also available in an easy to mix concentrate: Eight 31 lb. boxes of concentrate equals one 2300 lb. tote when reconstituted and saves the cost of shipping 2000+ lbs per tote – a savings of up to 85 % in shipping costs. In addition, there is a cold weather version of this which includes the above benefits plus protects from freezing to temperatures as low as negative 35 °F.

TyrFil High-Speed Sealants are available in 6 gallon pails, 55 gallon drums and 330 gallon totes. TyrFil Wheel Conditioners are available in 6 gallon pails, 55 gallon drums, 330 gallon totes and 31 lb. boxes of concentrate.
