# Contents

Preface.....	VII
<b>1 Overview and Compound Ingredients.....</b>	<b>1</b>
1.1 Introduction.....	1
1.2 Philosophy of Polymer Compounds.....	1
1.3 Polymers.....	4
1.3.1 Homopolymers.....	4
1.3.2 Copolymers.....	8
1.3.2.1 General.....	8
1.3.2.2 Butadiene Copolymers.....	9
1.3.2.3 Ethylene-Olefin Copolymers.....	11
1.3.3 Molecular Weight Distribution.....	12
1.3.4 Transition Behavior.....	13
1.3.5 Melt Rheological Properties.....	15
1.3.6 Mechanical Behavior.....	22
1.4 Particle Fillers and Reinforcements.....	23
1.4.1 General.....	23
1.4.2 Carbon Black.....	24
1.4.3 Calcium Carbonate.....	27
1.4.4 Zinc Oxide (ZnO).....	29
1.4.5 Titanium Dioxide.....	31
1.4.6 Silica.....	31
1.4.7 Talc and Mica.....	36
1.4.8 Kaolin Clays.....	39
1.4.9 Fibrous Silicates and Wollastonite.....	41
1.4.10 Glass Fibers.....	43
1.4.11 Glass Spheres.....	43
1.4.12 Organic Fillers.....	44
1.4.12.1 Cellulose and Cellulose Fibers.....	45
1.4.12.2 Starch.....	51
1.4.12.3 Aramid Fibers.....	52
1.4.12.4 Carbon Fibers.....	53
1.4.13 Nanofillers.....	53
1.4.13.1 Montmorillonite.....	53
1.4.13.2 Carbon Nanotubes.....	54
1.5 Oils and Plasticizers.....	55
1.6 Antidegradents.....	56
1.7 Processing Aids.....	57
1.8 Curatives.....	60
1.9 Accelerators.....	62

<b>2</b>	<b>Polymer-Particle Filler Systems</b> .....	73
2.1	Introduction .....	73
2.2	Particle Properties and Interaction .....	73
2.2.1	Particle Density .....	73
2.2.2	Particle Size .....	75
2.2.3	Particle Shape .....	77
2.3	Hydrodynamic Theory of Suspensions .....	78
2.3.1	General .....	78
2.3.2	Spheres .....	79
2.3.3	Ellipsoids .....	80
2.3.4	Interacting Particles .....	81
2.3.5	Continuum Theories .....	81
2.4	Experimental Studies of Compound Properties .....	82
2.4.1	Large Spheres .....	82
2.4.2	Large Fibers and Ellipsoids .....	83
2.4.2.1	Fluids .....	83
2.4.2.2	Solids .....	85
2.4.3	Carbon Black .....	89
2.4.3.1	Thermoplastic Melts/Uncured Compounds .....	89
2.4.3.2	Rubber Vulcanizates .....	91
2.4.4	Calcium Carbonate ( $\text{CaCO}_3$ ) .....	93
2.4.4.1	Thermoplastic Melts .....	93
2.4.4.2	Solid Thermoplastics .....	95
2.4.5	Silica .....	96
2.4.5.1	Uncured Rubber Compounds .....	96
2.4.5.2	Rubber Vulcanizates .....	96
2.4.6	Talc and Mica .....	96
2.4.6.1	Thermoplastic Melts .....	96
2.4.6.2	Solid Polymers .....	98
2.4.7	Montmorillonite and Organo Clays (Nano Composites) .....	98
2.4.8	Carbon Nano-Tubes .....	99
2.5	Summary .....	100
<b>3</b>	<b>Polymer Solutions and Swollen Vulcanizates</b> .....	105
3.1	Introduction .....	105
3.2	Low Molecular Weight Solutions .....	105
3.3	Thermodynamics of Polymer Solutions: Flexible Chains .....	110
3.4	Solubility of Crystalline Polymers .....	112
3.5	Solutions of Rigid Chain Polymers .....	113
3.6	Thermodynamics of Heterogeneous Flexible Chain Polymer Solutions .....	114
3.7	Phase Separation and Equilibrium .....	114
3.8	Swelling of Vulcanizates .....	117
3.9	Rheological Properties of Polymer Solutions .....	118
3.10	Oil-Extended Rubber .....	122

3.11 Plasticized Polyvinyl Chloride .....	123
3.12 Summary.....	124
<b>4 Polymer Additive Binary Systems .....</b>	<b>129</b>
4.1 Introduction.....	129
4.2 Solubility of Additives .....	129
4.3 Antioxidants.....	131
4.3.1 General.....	131
4.3.2 Mechanism of Oxidation .....	132
4.3.3 Antioxidant Mechanisms .....	133
4.3.4 Antioxidant Miscibility .....	133
4.3.5 Antioxidant Migration .....	134
4.4 Antiozonants .....	136
4.5 Light Stabilizers.....	137
4.6 Heat Stabilizers .....	138
4.7 Processing Aids .....	140
4.8 Surface Property Modifiers .....	144
4.9 Antistatic Additives.....	144
4.10 Nucleating Agents .....	145
4.11 Curatives .....	147
4.11.1 Sulfur Crosslinking .....	147
4.11.2 Crosslinking by Organic Peroxides.....	148
4.11.3 Crosslinking by Metallic Oxides .....	149
4.11.4 Crosslinking by Phenolic Derivatives.....	149
4.11.5 Crosslinking by High Energy Radiation .....	149
4.12 Summary.....	152
<b>5 Binary Polymer Blends.....</b>	<b>157</b>
5.1 Introduction.....	157
5.2 Thermodynamics of Polymer-Polymer Miscibility .....	157
5.3 Statistical Thermodynamic Interpretation.....	159
5.4 Miscible Polymer Blends .....	160
5.5 Partial Miscibility .....	164
5.6 Problems With Copolymers .....	166
5.7 Immiscible Polymer Blends and Interfacial Tension .....	167
5.8 Phase Morphology in Immiscible Binary Polymer Blends.....	173
5.9 Special Polymer Melt Phase Distributions.....	175
5.10 Mechanical Properties of Binary Polymer Blends .....	177
5.11 Blends of Recycled Polymers.....	177
<b>6 Ternary Systems:</b>	
<b>Polymer Blends plus Liquid Additives and Compatibilizing Agents .....</b>	<b>181</b>
6.1 Introduction.....	181
6.2 Ternary Low Molecular Weight Systems.....	181

---

6.3	Polymer Plus Two Low Molecular Weight Liquids.....	183
6.4	Low Molecular Weight Oils/Additives in Binary Polymer Blends.....	186
6.5	Amphiphilic Molecules and Block Graft Copolymers in Immiscible Polymer Blends (Compatibilized Blends).....	190
6.6	Mechanical Properties of Compatibilized Blends.....	192
6.7	Compatibilized Recycled Polymer Blends .....	194
6.8	High Impact Polystyrene (HIPS).....	194
6.9	Ternary Polymer Blends.....	195
6.10	Summary.....	195
<b>7</b>	<b>Polymer-Filler-Additives and Curative-Accelerator Compounds.....</b>	<b>201</b>
7.1	Introduction.....	201
7.2	Mineral Fillers: Carboxylic Acid-Polymer .....	201
7.3	Organic-Silane Coupling Agent for Thermosets, Thermoplastics, and Rubber.....	203
7.4	Organo Clay Nanocomposites (Clay-Organic Amine-Polymer).....	205
7.5	Rubber-Sulfur-Accelerator .....	207
7.6	Crosslinking by Enzymes.....	208
7.7	Particle Filler with Two Polymers .....	208
<b>8</b>	<b>Multicomponent Compounds .....</b>	<b>213</b>
8.1	Introduction.....	213
8.2	Simple Multicomponent Compounds .....	213
8.3	Tire Compounds.....	214
8.3.1	Polydiene-Carbon Black Oil Compounds.....	214
8.3.2	Polydiene-Rubber-Silica Compounds .....	215
8.4	Thermoplastic Compounds .....	216
8.4.1	Polyvinyl Chloride Compounds .....	216
8.4.2	Isotactic Polypropylene Compounds.....	217
8.4.3	Recycled Polymer Blend Compounds .....	218
8.5	Rubber Compounds with Special Mechanical Properties.....	219
8.5.1	Chlorinated Butyl Rubber Compounds.....	219
8.5.2	Nitrile Rubber Compounds.....	222
8.5.3	Ethylene-Propylene-Diene Terpolymer (EPDM) Compounds.....	224
8.6	Thermoplastic Elastomer (TPE) Compounds.....	225
8.6.1	Elastomer-Modified Polypropylene .....	225
8.6.2	SBS-Type Thermoplastic Elastomer.....	225
<b>9</b>	<b>Mixing Machinery: Batch and Continuous.....</b>	<b>229</b>
9.1	Introduction.....	229
9.2	Batch Mixers.....	229
9.2.1	Mills .....	229
9.2.2	Open Batch Mixers.....	230
9.2.3	Internal Mixers: Non-Intermeshing Rotors .....	234

9.2.3.1	Technology .....	234
9.2.3.2	Basic Studies .....	243
9.2.4	Internal Mixers: Intermeshing.....	246
9.2.4.1	Technology .....	246
9.2.4.2	Basic Studies .....	247
9.2.5	Internal Mixer Cycles.....	247
9.3	Continuous Mixers .....	249
9.3.1	Single-Screw Extruders .....	249
9.3.2	List (Buss-Coperion) Kokneters/Kneaders .....	249
9.3.2.1	Technology .....	249
9.3.2.2	Basic Studies .....	251
9.3.3	Intermeshing Modular Co-Rotating Twin-Screw Extruders.....	252
9.3.3.1	Technology .....	252
9.3.3.2	Basic Studies .....	255
9.3.4	Intermeshing Modular Counter-Rotating Twin-Screw Extruders .....	257
9.3.4.1	Technology .....	257
9.3.4.2	Basic Studies .....	259
9.3.5	Tangential Modular Counter-Rotating Twin-Screw Extruders.....	260
9.3.5.1	Technology .....	260
9.3.5.2	Basic Studies .....	260
9.3.6	Continuous Mixers .....	261
9.3.6.1	Technology .....	261
9.3.6.2	Basic Studies .....	262
9.3.7	The Strategy of Adding Ingredients During Continuous Mixing.....	264
9.4	Comparison of Commercial Mixing Machines.....	264
9.4.1	Batch Internal Mixers vs. Continuous Mixers .....	264
9.4.2	Comparison of Continuous Mixing Machines .....	265
9.5	Reactive Extrusion.....	265
9.5.1	Polymer Modification and Grafting Reactions.....	265
9.5.2	Polymerization .....	266
