
Evonik to increase prices for select PU additives in North America

Effective 15 September 2010, the Polyurethane Additives business line of Evonik Goldschmidt Corporation will increase Kosmos 29 stannous octoate prices by 20 % in North America. Prices for Kosmos 29 dilutions and Kosmos 19 di-butyl tin di-laurate will increase accordingly.

The increase is necessary due to rising raw material costs, says the company. Kosmos 29 is used as a catalyst in the foam manufacturing industry.
