

Keyuan to expand its annual design capacity

Keyuan Petrochemicals, Inc., a Chinese manufacturer of petrochemical products, located in Ningbo, will expand its design production capacity by approximately 30 % from 550,000 t to 720,000 t/y.

Keyuan will invest about USD 3.8 million to upgrade the catalytic pyrolysis processing equipment used in its existing production facilities. The installation is scheduled to begin in March and is expected to be completed by the end of the second quarter of 2011. Furthermore, Keyuan plans to expand its manufacturing capacity to include a SBS production facility.
